

Relational Model:

- **Users** (User_ID, password, Email_ID, gender, Address, Current_location, Ethnicity)
User_ID is PRIMARY KEY and Email ID is Unique.
- **Feedback** (Feedback_ID, Description, *User_ID*)
Feedback_ID is PRIMARY KEY
FOREIGN KEY User_ID refers to Users; NOT NULL
- **Belong_to** (User_ID, Area_ID)
FOREIGN KEY User_ID refers to Users; NOT NULL
FOREIGN KEY Area_ID refers to Areas; NOT NULL
User_ID and Area_ID is PRIMARY KEY together
- **Areas** (Area_ID, Crime_Rate, Location, Nearest_Safezone_ID)
Area_ID is PRIMARY KEY
- **Safezone** (Safezone_ID, Location)
Safezone_ID is the PRIMARY KEY
- **PoliceStation** (Safezone_ID)
FOREIGN KEY Safezone_ID refers to Safezone; NOT NULL
- **Hospitals** (Safezone_ID)
FOREIGN KEY Safezone_ID refers to Safezone; NOT NULL
- **FireStation** (Safezone_ID)
FOREIGN KEY Safezone_ID refers to Safezone; NOT NULL
- **Transportation** (Safezone_ID, Routes, Timings, Type)
FOREIGN KEY Safezone_ID refers to Safezone; NOT NULL
- **Has** (Area_ID, Safezone_ID)
FOREIGN KEY Area_ID refers to Areas; NOT NULL
FOREIGN KEY Safezone_ID refers to Safezone; NOT NULL
Safezone_ID and Area_ID is PRIMARY KEY together
- **Incidents** (Incident_ID, Description, Incident_type)
Incident_ID is the PRIMARY KEY
- **Occurred** (Area_ID, Incident_ID)

FOREIGN KEY Incident_ID refers to Incidents; NOT NULL

FOREIGN KEY Area_ID refers to Areas; NOT NULL

Incident_ID and Area_ID is PRIMARY KEY together

- **Suspects** (Suspect_ID, Name, Address_Area, In_jail, Photo)

Suspect_ID is PRIMARY KEY

- **Caused_by** (Incident_ID, Suspect_ID)

FOREIGN KEY Incident_ID refers to Incidents; NOT NULL

FOREIGN KEY Suspect_ID refers to Incidents; NOT NULL

Incident_ID and Suspect_ID is PRIMARY KEY together

Implementation in MySQL:

Creation of Tables using Create Command:

-- Table: Users

CREATE TABLE Users (

User_ID INT PRIMARY KEY,

Password VARCHAR(255), -- assuming a reasonable length

Email_ID VARCHAR(255) UNIQUE,

Gender VARCHAR(10), -- assuming 'Male' or 'Female'

Address VARCHAR(255),

Current_location VARCHAR(255),

Ethnicity VARCHAR(50)

);

-- Table: Feedback

```
CREATE TABLE Feedback (  
  
    Feedback_ID INT PRIMARY KEY,  
  
    Description TEXT,  
  
    User_ID INT NOT NULL,  
  
    FOREIGN KEY (User_ID) REFERENCES Users(User_ID),  
  
    FOREIGN KEY (Area_ID) REFERENCES Areas(Area_ID)  
  
);
```

-- Table: Belong_to

```
CREATE TABLE Belong_to (  
  
    User_ID INT,  
  
    Area_ID INT,  
  
    PRIMARY KEY (User_ID, Area_ID),  
  
    FOREIGN KEY (User_ID) REFERENCES Users(User_ID),  
  
    FOREIGN KEY (Area_ID) REFERENCES Areas(Area_ID)  
  
);
```

-- Table: Areas

```
CREATE TABLE Areas (  

```

```
Area_ID INT PRIMARY KEY,  
  
Crime_Rate FLOAT,  
  
Nearest_Safezone_ID INT,  
  
Location VARCHAR(255)  
  
FOREIGN KEY (Nearest_Safezone_ID) REFERENCES Safezone(Safezone_ID)  
  
);
```

-- Table: Safezone

```
CREATE TABLE Safezone (  
  
    Safezone_ID INT PRIMARY KEY,  
  
    Location VARCHAR(255)  
  
);
```

-- Table: PoliceStation

```
CREATE TABLE PoliceStation (  
  
    Safezone_ID INT PRIMARY KEY,  
  
    FOREIGN KEY (Safezone_ID) REFERENCES Safezone(Safezone_ID)  
  
);
```

-- Table: Hospitals

```
CREATE TABLE Hospitals (  
  
    Safezone_ID INT PRIMARY KEY,  
  
    FOREIGN KEY (Safezone_ID) REFERENCES Safezone(Safezone_ID)  
  
);
```

-- Table: FireStation

```
CREATE TABLE FireStation (  
  
    Safezone_ID INT PRIMARY KEY,  
  
    FOREIGN KEY (Safezone_ID) REFERENCES Safezone(Safezone_ID)  
  
);
```

-- Table: Transportation

```
CREATE TABLE Transportation (  
  
    Safezone_ID INT PRIMARY KEY,  
  
    Routes VARCHAR(255),  
  
    Timings VARCHAR(50),  
  
    Type VARCHAR(50),  
  
    FOREIGN KEY (Safezone_ID) REFERENCES Safezone(Safezone_ID)  
  
);
```

-- Table: Has

```
CREATE TABLE Has (  
  
    Area_ID INT,  
  
    Safezone_ID INT,  
  
    PRIMARY KEY (Area_ID, Safezone_ID),  
  
    FOREIGN KEY (Area_ID) REFERENCES Areas(Area_ID),  
  
    FOREIGN KEY (Safezone_ID) REFERENCES Safezone(Safezone_ID)  
  
);
```

-- Table: Incidents

```
CREATE TABLE Incidents (  
  
    Incident_ID INT PRIMARY KEY,  
  
    Description TEXT,  
  
    Incident_type VARCHAR(50)  
  
);
```

-- Table: Occurred

```
CREATE TABLE Occurred (  
  
    Area_ID INT,  
  
    Incident_ID INT,
```

PRIMARY KEY (Area_ID, Incident_ID),

FOREIGN KEY (Area_ID) REFERENCES Areas(Area_ID),

FOREIGN KEY (Incident_ID) REFERENCES Incidents(Incident_ID)

);

-- Table: Suspects

CREATE TABLE Suspects (

Suspect_ID INT PRIMARY KEY,

Name VARCHAR(255),

Address_Area VARCHAR(255),

In_jail BOOLEAN,

Photo BLOB -- assuming binary large object for storing images

);

-- Table: Caused_by

CREATE TABLE Caused_by (

Incident_ID INT,

Suspect_ID INT,

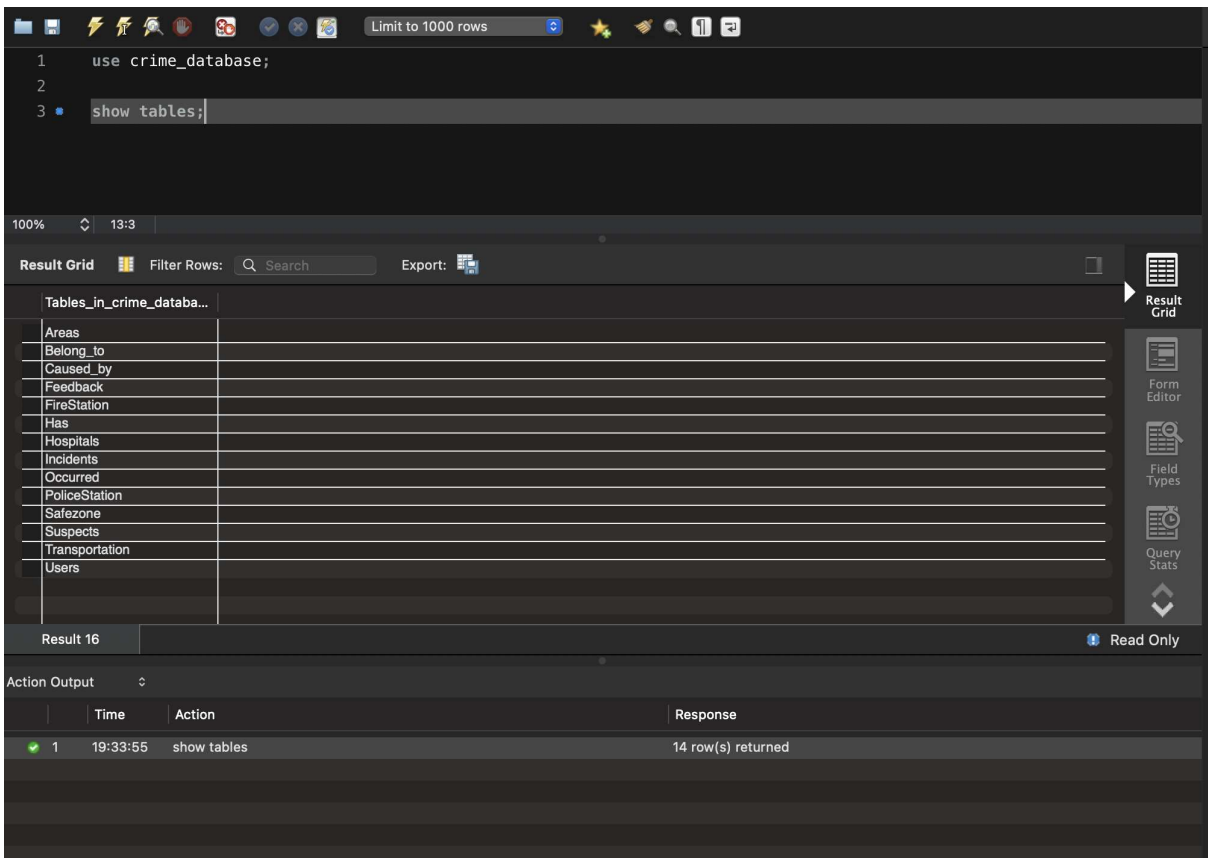

PRIMARY KEY (Incident_ID, Suspect_ID),

FOREIGN KEY (Incident_ID) REFERENCES Incidents(Incident_ID),

```
FOREIGN KEY (Suspect_ID) REFERENCES Suspects(Suspect_ID)  
  
);
```

Populating our database:

Showing all of tables:

Included Tables and Specified Number of Rows for Populating Data

Included Tables			
Tables	Status	Generate Row...	Generator Message
Crime_Database.Incidents	Has Data	100	
Crime_Database.Safezone	Has Data	20	
Crime_Database.Suspects	Has Data	50	
Crime_Database.Transportation	Has Data	20	
Crime_Database.Users	Has Data	50	
Crime_Database.Areas	Has Data	25	
Crime_Database.Belong_to	Has Data	50	
Crime_Database.Caused_by	Has Data	50	
Crime_Database.Feedback	Has Data	10	
Crime_Database.FireStation	Has Data	10	
Crime_Database.Has	Has Data	20	
Crime_Database.Hospitals	Has Data	10	
Crime_Database.Occurred	Has Data	20	
Crime_Database.PoliceStation	Has Data	10	

Populated Data and Displaying Areas in Our Database

```

1  use crime_database;

Populated Data and Displaying Incidents in Our Database

The screenshot shows a database management interface with a SQL editor at the top and a results grid below. The SQL editor contains the following code:

```
1 use crime_database;
2
3 -- Displaying the Incidents from the Database
4 select * from Incidents;
5
```

The results grid displays 10 rows of incident data:

Incident_ID	Description	Incident_Type
0	Financial fraud reported involving unauthorized t...	Violent crime.
1	Armed robbery at the 56 North White Hague Ro...	Violent crime.
2	Unlawful entry and theft reported at 64 West Gr...	Violent crime.
3	Graffiti and property damage reported on 815 W...	Violent crime.
4	Unlawful entry and theft reported at 689 West G...	Property crime.
5	Graffiti and property damage reported on 58 No...	Violent crime.
6	Stolen vehicle reported at the parking lot near 1...	Violent crime.
7	Unlawful entry and theft reported at 22 North Gr...	Violent crime.
8	Physical altercation between two individuals at...	Property crime.
9	Physical altercation between two individuals at...	Property crime.
10	Unlawful entry and theft reported at 81 West Ro...	Property crime.

Below the results grid, the 'Action Output' section shows the execution log:

	Time	Action	Response
✓ 1	18:53:02	select * from Areas LIMIT 0, 1000	25 row(s) returned
✓ 2	18:58:01	select * from Users LIMIT 0, 1000	50 row(s) returned
✓ 3	19:04:28	select * from Incidents LIMIT 0, 1000	100 row(s) returned
✓ 4	19:15:17	select * from Incidents LIMIT 0, 1000	100 row(s) returned

Populated Data and Displaying Transportation in Our Database

The screenshot shows a database management interface with a SQL editor at the top and a results grid below. The SQL editor contains the following code:

```
1 use crime_database;
2
3 -- Displaying the Transportation from the Database
